

Mochi.Market envisions to be the multi-chain decentralized exchange ecosystem for non-fungible tokens (“NFT”).

The biggest names are participating in DeFi & NFT

Binance

Ubisoft

Deadmau5

NBA Topshot

Formula One

ONE MOCHI BITE AT A TIME:

Given the recent global mainstream media and personalities spotlight on NFTs in general, Mochi.Market is well positioned to ride in the industry’s growth by taking active part in solving some of the real problems and challenges that the industry faces.

THE INITIAL BITE AT THE MOCHI MARKET:

The main initial commercial focus is to connect DeFi and NFT, in so doing, leveraging the best of both worlds. Mochi.Market initially aims to solve three important current challenges: lack of liquidity in the NFT market, lack of monetization strategy for NFT holders during their holding period, and lack of crosschain usage between NFTs and FTs.

WHAT WE BRING TO THE TABLE:

High transaction fee, large ticket size and liquidity issues are some of the real pain points the NFT industry is facing. We strive to create an economy where (i) NFT want-to-owns do not feel being left out - everyone can buy it, (ii) NFT holders do not feel being left out for holding NFT – through holding incentives such as yield programs, and (iii) NFT and Fungible tokens (“FT”) are seamlessly intersecting across multiple blockchains through interoperability.
